

# 7 Reasons

Phenova Environmental CRMs Provide a New Standard of Confidence

1

## Stay in Calibration Longer

By analytically verifying with internal and external CRMs we ensure each lot is as consistent as the next. This means fewer initial calibrations and you stay in control.

2

## Extended Lifespan

Contamination and stability issues are eliminated by using deactivated glassware and ampoules with inert gas purging.

3

## Simple and Smart Packaging

The slim fit casing allows easier storage and each ampoule comes conveniently attached with extra labels for transfer vials, paperwork, etc.

4

## Dependable Inventory

With multiple lots readily available, you can count on product to be shipped when you need it.

5

## Experience You Can Count On

The team of Sr. Analytical Chemists and Technicians who produce Phenova CRMs have over 300 years of combined experience utilizing and manufacturing reference materials.

6

## Personalized Technical Support

Your personal technical consultant is available to help with your analytical methods, reference standard or column (GC/LC) selection and more.

7

## 100% Certified - Guaranteed!

Phenova CRMs meet the strict criteria defined under ISO/IEC 17025 and ISO Guide 34 producing extremely accurate and consistent CRMs.
